

PHYS-467 Machine Learning for Physicists  
**Exercise session 12: Fully-Connected Neural Networks**

**Exercise n. 1**

1. Train a fully connected network on MNIST dataset using PyTorch. Plot the train loss and the train accuracy as a function of the number of epochs. Evaluate the generalization performances of the network by evaluating the test error.

**Exercise n. 2**

1. Repeat exercise n.1 with SUSY dataset.
